

As a supporter for christian broadcasting, I have no interest in adversaries who don't share my faith ripping apart a radio station that gives God-based support to the community. In addition, the government has no place putting restrictions on ministry which is aired, which would be sure to happen if the station is regulated as proposed; or making my station promulgate messages which are counter to the christian faith and message. Finally, my radio station is supported solely by the community that listens to the radio-not by money-hungry commercialists. I don't want my money wasted to pay for licenses or other legal fees that would be associated with the proposed legislation. I am VERY STRONGLY AGAINST THIS LEGISLATION!!!
